

## *Studia dipterologica* – Instructions to authors

The aim of *Studia dipterologica* is to promote dipterology. Original papers on taxonomy, phylogenetic systematics, faunistics, biology, ecology, zoogeography and behaviour may be submitted, provided they are concerned mainly with the Diptera. In addition, biographies of famous dipterologists (CVs, Festschriften, obituaries, bibliographies etc.), reports on dipterological excursions or expeditions, papers on dipterological collections, catalogues and checklists, meeting and congress reports, short notes, and reviews of books with a dipterological content will also be considered for publication. **Frequency of publication** of *Studia dipterologica* is yearly. One volume will contain two issues with a total of 300 consecutively numbered pages. **Languages of publication** are English and German. The language quality of submitted manuscripts will be checked by the editors. Authors are reminded to follow the **Instructions to Authors** (particularly with the reference lists!). **Typesetting and printing** of contributions up to 50 printed pages is free of charge. Authors will be invoiced for the additional costs incurred in the publication of longer works (currently an additional 15.00 € per page from page 51 onwards). The authors of all articles will be supplied free of charge with an **electronic version** (PDF). **Reprints** must be paid for, and prices depend on the number of printed pages. Current **Prices** (annual subscription, prices for individual issues) and terms for delivery and payment may be found on the journal homepage at <http://www.studia-dipt.de/pricee.htm>.

Papers submitted for publication must not have been published or submitted for publication in other journals. Authors must adhere to the 4th Edition of the ICZN (1999). **Genus and species names** should always be in italics. All species names mentioned must be given at least once with author and year of description, separated by a comma (Art. 22, Recommendation 22A: Method of citation ICZN). In papers on taxonomy, the abbreviations **fam. nov.**, **subfam. nov.**, **gen. nov.**, **subgen. nov.**, **spec. nov.**, **subspec. nov.**, **nom. nov.**, **syn. nov.**, **comb. nov.**, **restit.**, **auct.**, **spec.**, **agg.**, **cf.** etc. should be used.

Papers must contain both an English and a German summary. Each must be followed by a selection of not more than 10 key words (English) or “Stichwörter” (German). The editorial board offers to translate the English title, abstract and key words into German. So far as possible, manuscripts (English manuscripts) should be arranged into the following sections: **Title of the paper** [in English] – below this in brackets [title of the paper in German] – **Author(s)** – **City and country of work** – **Abstract** – **Key words** – **Zusammenfassung** (a translation of the English abstract into German) – **Stichwörter** (German translation of the key words) – **main text of the paper**. So far as possible, the text should be arranged into the following sections: **Introduction** – **Material and Methods** – **Results** – **Discussion** – **Acknowledgement(s)** – **Literature** – **Author’s address(es)** [full name(s), address(es) and e-mail(s)].

**Manuscripts** must be submitted in digital form (CD or E-mail). Documents prepared on IBM-compatible computers with the main word processing programmes can be adapted without difficulty (\*.doc or \*.rtf format). The following **formatting** must be done by the authors before submission: italics for *genus* and *species names*, small capitals for COLLECTOR, IDENTIFIER, AUTHORS of species and publications, SURNAMENES of cited persons), and bold (**Headings**). Do not separate syllables with a hard hyphen!

Please also send a version of the manuscript that contains all the **special characters**, as a printed copy by post or digitally as a PDF. In the submitted text version, the ♂ symbol should be replaced by \$ and ♀ by § (e. g. ♂♀ = \$\$; 1♂ = 1\$; 3♂♂ = 3\$\$; 1♀ = 1§; 5♀♀ = 5§§; 2♂♂ 7♀♀ = 2\$\$ 7§§). Do not use any personal special fonts in the manuscript.

Please note that in the captions for **figures, maps and tables**, the scientific name(s) of the species figured or mentioned in the headline of a table must include an author’s name (without year). Scale bars for the figures are recommended. Please submit the illustrations/figures as separate files (do not embed them in the text!). Only \*.tif and/or \*.jpg formats are acceptable. Please give a list of the captions for all figures, maps and tables at the end of the manuscript. Examples of **captions** for illustrations/figures/maps:

**Figs 2–4:** *Hocketomyia secunda* spec. nov., male terminalia (holotype). – 2: Aedeagus, lateral view; – 3: Hypopygium, dorsal view; – 4: Hypopygium, lateral view. Scale bars = 0.25 mm.

**Figs 1, 2:** *Centrophlebomyia furcata* (FABRICIUS), male from Spain. – 1: Habitus in lateral view; – 2: Head and thorax in dorso-lateral view. Photos: V. MICHELSEN.

**Fig. 3:** *Stilpon nubilus* COLLIN, ♂. – a: Wing; – b: Head lateral; – c: Antenna. Scale bar = 0.2 mm.

**Map 2:** Distribution of *Sciarosoma borealis* CHANDLER in Fennoscandia. Abbreviations: DK = Denmark; FI = Finland; NO = Norway; RU = Russia; SE = Sweden.

**Tab. 1:** Localities of *Stilpon lunatus* (WALKER) in Europe.

**Citing references in the text.** In citations of literature, author and year must not be separated by a comma! If there are more than two authors of a publication, citations in the text should use the term “et al.”. Examples:

... (MEYER 1990) ...                      ... from MEYER (1990) ...                      ... sensu MEYER (1990) ...  
 ... (PANTLE & BUCK 1955) ...                      ... from PANTLE & BUCK (1955) ...                      ... sensu PANTLE & BUCK (1955) ...  
 ... (RESH et al. 1988) ...                      ... from RESH et al. (1988) ...                      ... sensu RESH et al. (1988) ...

**Instructions on the section “Literature”.** The names of all authors should be given, and journal titles should be in full and unabbreviated. It is not necessary to give the number of single issues within a volume. The issue numbers are, however, obligatory when a volume consists of issues which are not consecutively paginated throughout or when the years of publication of issues within a single volume differ. Examples of the reference format for journals, books, book chapters, abstract volumes, online publications and unpublished works are (for articles in English):

- MACGOWAN, I. (2004): New species of Palaearctic Lonchaeidae (Diptera). – *Dipterists Digest, Second Series* **11**: 25–32.
- STUKE, J.-H. & MERZ, B. (2006): Drei für Deutschland neu nachgewiesene acalyptrate Fliegen (Diptera: Lauxaniidae, Pallopteridae, Ulidiidae). – *Studia dipterologica* **12**(2) (2005): 242–254.
- VERVES, Y. G. (1979): Review of the subfamily Miltogrammatinae (Diptera, Sarcophagidae) of Sri Lanka. – *Éntomologicheskoe obozrenie* **58**: 883–897 [in Russian, English translation in *Entomological Review* **58**: 159–173].
- HARTOP, E. & BROWN, B. (2014): The tip of the iceberg: a distinctive new spotted-wing *Megaselia* species (Diptera: Phoridae) from a tropical cloud forest survey and a new, streamlined method for *Megaselia* descriptions. – *Biodiversity Data Journal* **2**: 17 pp. [doi: 10.3897/BDJ.2.e4093].
