<b>Abstract</b>	Species of the following acalyprate families collected in Greece are listed: Drosophilidae (52 species, 16 of them new to Greece), Camillidae (5 species, 1 new), Curtonotidae (1 species, new), Diastatidae (3 species, 2 new), Odiniidae (4 species, 3 new), and Periselididae (1 species, new). Colour variation in two species of Drosophilidae [ <i>Phortica erinacea</i> (MÁCA, 1977) and <i>Chymomyza caudatula</i> OLDENBERG, 1914] is described for the first time. Specimens of all but nine of the species were collected in the vicinity of Kerkini, northern Greece. Little has been published on the Acalypratae from most parts of Greece.
<b>Key words</b>	Acalypratae, Drosophilidae, Camillidae, Curtonotidae, Diastatidae, Odiniidae, Periselididae, Palaearctic Region, Greece, faunistics, new records
<b>Zusammenfassung</b>	Die in Griechenland vorkommenden Arten der folgenden Familien werden aufgelistet: Drosophilidae (52 Arten, davon 16 neu für Griechenland), Camillidae (5 Arten, davon 1 neu), Curtonotidae (1 Art neu), Diastatidae (3 Arten, davon 2 neu), Odiniidae (4 Arten, davon 3 neu) und Periselididae (1 Art neu). Bei zwei Drosophilidae-Arten [ <i>Phortica erinacea</i> (MÁCA, 1977) und <i>Chymomyza caudatula</i> OLDENBERG, 1914] wurde Farbvariabilität festgestellt. Die meisten der hier gemeldeten Arten wurden in der Umgebung von Kerkini (Nord-Griechenland) gesammelt. Bislang ist wenig über akalyprate Familien aus den übrigen Teilen Griechenlands publiziert worden.
<b>Stichwörter</b>	Acalypratae, Drosophilidae, Camillidae, Curtonotidae, Diastatidae, Odiniidae, Periselididae, paläarktische Region, Griechenland, Faunistik, neue Funde

### Introduction

A list of Drosophilidae and some other families from the vicinity of Kerkini was given by MÁCA (2007). All hitherto known Greek localities, concerning the families here considered, have been presented by BACHLI (2009). In the years 2007 and 2008 collections were made again in the vicinity of Kerkini by G. J. L. RAMEL. The collections were more extensive than previous ones and 15 species new for Greece were added. A few specimens were collected in the vicinity of Kerkini by the present author and several Greek specimens from the coll. M. BARTÁK (Praha) are reported upon for the first time. This enabled me to compile a new, reasonably complete list of species, including zoogeographical information, on the Drosophilidae and some other acalyprate families of Greece.
